1. The following is an examiner's statement of reasons for allowance: Independent claims recites, along with the other elements, a switching mechanism of the charge eliminating mechanism, wherein when a third end of a contact terminal is in contact with the stage, the stage is grounded through a grounded wiring line connected to the fourth end of the contact terminal, and the third end of the contact terminal and the stage come into contact with each other by moving the stage in X, Y directions.

JP 9098/1994 reference discloses the switching mechanism and a grounded wiring line (in two different embodiments), and differs as the third end and the stage come into contact by moving a robot arm, not by moving the stage in X and Y directions, and as the stage is not grounded through the grounded wiring line.

The del Puerto reference discloses a switching mechanism of charge eliminating system, wherein the third end of the contact terminal comes into contact with the stage by moving the contact terminal in X and Y directions. The above feature, in combination with the other recited elements, is not disclosed by prior art of record, and therefore allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
